[Setting the time signal]

Press (or (to complete.

Every time the (A) button is pressed in the time signal mode, the time-signal-ON-mark appears or disappears. When the time-signal-ON-mark appears, the watch chimes every hour on the hour,

[Stopwatch operation]

A signal confirms start/stop operation. (Working range) In the stopwatch mode the display of minute, second and 1/10th second is limited to 20 minutes from which is automatically converts to the display of hours, minutes and seconds up to 11 hours 59 minutes 59 seconds, for longer times reset and started again.

Press © to complete.

[Setting time and calendar]

* Precise time can be maintained by correcting the seconds once a month on a time signal from a radio, TV, telephone, etc. (Quick digit advance) When the (a) button is pressed for more than 2 seconds, the digit advances quickly. When released, the digit advance will stop. (Independent correction) Correction of any digit, if not required, can be skipped by pressing the 🔘 button repeatedly. (Reversion to normal timekeeping mode) The watch reverts to the normal timekeeping mode if the © button is pressed, regardless of the digit setting mode.

(Auto-retrieve function) Any setting display will automatically return to the regular timekeeping mode in 1 or 2 minutes.
